423 distinctions are more minute than is at all necessary or indeed
428 comprehensible. They include all children born out of wed-
848 lock, among whom are reckoned such as are born before the parents have been married ten months; all children that are
[597] purchased, or adopted by any other ceremony than that of abadita or keiktima; and such as "from respect or affection
423 style their guardians father or mother." The settlement of
184 boundary marks was one of the earliest duties of the first ruler. The thale rice became constantly scarcer and scarcer, and it was determined that it would be well to give every person his share and mark it off distinctly. The appointment of persons to execute this duty was the first occasion on which executive officials were found necessary. Manu enumerated twenty-five objects suitable for legal landmarks. These included all natural objects, such as lakes, rivers, ridges, and hills, remarkable large trees and clumps of bamboos; artificial boundaries of an equally permanent character, such as pagodas, shrines for demon-worship, zayats, or rest-houses, stone pillars and sacred posts, wells and cairns; finally such singular distinguishing marks as heads of cattle, chaff, ashes, charcoal, sand, broken earthenware vessels, and men's bones. "Beating the bounds," one would think, must have been very necessary with the younger members of the household in the case of such perishable boundary lines as could be constituted by chaff, or even sand. In Upper Burma the cultivating
●[161] population was so sparse that no difficulty was found in the matter of boundaries. In Lower Burma farms are as distinctly marked off as land-surveyors' chains can effect the operation in pointing out the little raised ridges which separate the plots of paddy land from one another. Nevertheless they are hardly such as the South of England farmers would approve.

423 These allodial tenures are the only ones which exist in
[177-92] Burma now. In independent territory there were two other
651 kinds of holding, which were not, however, very numerous or
622 extensive. The first of these were called thugyisa fields, and consisted of certain tracts of land near the town or village set apart for the maintenance of the headman. As that official was anything but a permanency, the tenant for the time being very seldom cultivated them himself, but let them

CHAPTER LVIII

MANDALAY AND RANGOON

[This chapter describes these towns as they were in 1881.]

361
177.36
439

AMERICANS talk, and with good reason, of the magic growth of their cities. But for mere mushroom growth, Mandalay might compare even with Chicago itself, and if we are to judge of the progress of a commercial place by the fair criterion of business results, Rangoon may hold up its head in confident rivalry with any of the typical American cities. In the middle of last century the site of Mandalay was swampy paddy land and rank jungle. Now an area of five square miles is covered with houses, many of them squalid enough certainly, and with large patches of unused land round about them, but none the less contained within the city limits. Rangoon came into British hands in 1852, and at that time possessed no commerce worthy of the name, indeed it was only known as the place for pilgrims to the Shwe Dagôn pagoda to stay at, and the residence of the Regent of Pegu, as being the guard station on the most accessible mouth of the Irrawaddy. Ten years later, ships entered or cleared from the port having a tonnage of 295,000 tons, and the imports were worth £1,200,000, the exports £1,400,000, and since that date—a year or two after Mandalay had been founded—the tonnage has increased to 1,000,000, the value of the imports to £5,000,000 sterling, and the exports to £4,000,000. In a quarter of a century the commerce of British Burma rose to nearly £20,000,000 sterling. The population has quadrupled; public works are carried on; education is widely disseminated; the administration is carefully managed by British officials; a railway,

clouds of dust. The Rainy Season begins sometime late in May or early in June and lasts until October. Almost all of Tadagale's 90 to 100 inches of annual rainfall comes during this period. It rains every day, in periodic downpours which often start so suddenly that the newcomer to the area is caught unaware on a good many occasions. Although temperatures drop during the Rainy Season to daily maxima in the low 80's, the discomfort, for the average denizen of the temperate zone, is greater than in the Hot Season because of the extremely high humidity and the small difference between daily maximum and minimum temperatures. 132

The Burmese inhabitants of the community, who are 90% of the population, are medium brown in skin color, tend to be broad-nosed, have straight black hair, and are of medium stature. 142

All of the men, with the exception of a few of the old ones, wear their hair in western style, cut short and parted on one side. The women, however, adhere to the traditional Burmese hair styles, without exception. Little girls wear their hair in a top-knot on the middle of the head, with a circular part around the temples and crown, short bangs hanging down in front. Adult women comb their hair, liberally oiled, back to form a coiled knot at the nape of the neck. Adherence by the women to traditional hair styles and mode of dress is strikingly in contrast with the situation in neighboring Thailand, where permanent waves and short skirts may be seen among peasant women many miles outside the capital. 302 177

Burmese dress is universal in the village. It consists of the longyi, a circular, single-seamed skirt reaching to the ankles, and a jacket. The longyi is worn by both sexes. The woman's longyi differs from the man's in that it has a black waistband sewn to the upper edge. It is folded over and tucked in at the waist. The man's longyi is drawn tight about the waist and knotted in front to hold it in place. Women's jackets (the aingyi) are not quite so loose-fitting as men's, and for dress occasions they are made of fine muslin, or, if it can be afforded, sheer nylon, climate notwithstanding. Men's jackets are of a heavier material, and are never worn at the workaday tasks of everyday life in the village; the men generally go unclad from the waist up. For ordinary wear both sexes use wooden clog-like shoes, held to the foot by a single band of rubber over the in-step. For dress occasions, single-thonged leather sandals are worn. 291

About nine hundred people live in Tadagale. Census data collected at first-hand do not yield exact information because a few families could not be interviewed. The data include 807 people, and it is doubtful if as many as one hundred people were not covered by the census. 161 ●

In Table I below the population of the village is given in terms of ethnic groups. The imposition of any a priori set of categories was avoided, and informants were simply asked the question, "To what people do you consider yourself to belong?" In this way it was possible to learn something of the group identifications of informants. 162

APPENDIX D.

STATISTICAL.

AREA.

131

Burma Proper and Pegu (excluding Shan States, 61,000 sq. m.) square miles	158,322 = 101,326,122 acres.
Area cropped, 1900	10,556,104 acres.

161

POPULATION IN 1901 (including Shan States, 1,228,460)	9,221,181
Mean annual birth-rate per 1,000	37·34
,, death ,, ,,	28·16

162

DISTRIBUTION OF POPULATION IN 1891.

Burmans and Talaings { males, 3,030,797 / females, 3,098,385 } (Increase since 1881, 22½ per cent.)	6,129,182
Shans	206,794
Karéns	633,657
Chins	95,571
Chimpáws (Kachin ? more)	2,300
Chinese	37,407
Natives of India	432,639
Europeans (including 4000 troops)	12,491
Eurasians	6,978
Others	167,134
Total, census of 1891	7,722,053

FISCAL.

178 In 1796 the special impost of 33·3 tikals of fine silver per house took three years to collect, and produced the equivalent of about nine million rupees. The purchasing-power of money has 651 declined 50 to 60 per cent. since that time, apart from depreciation of silver.

435 In 1900 the gross revenue of Burma was 70,400,000 rupees, of which Pegu contributed 63 per cent. The expenditure was forty-three millions. Out of the surplus there was a balance of Rs. 24,700,000 of Imperial revenue over expenditure. The incidence of direct taxation (land and capitation taxes, which produce about one-half of the revenue) is four rupees per head of population; which, with an average of 5·5 inhabitants, comes to twenty-two rupees per house.

CRIMINAL, AVERAGES 1894–8.

6074

Convictions for offences against life (including attempted murder and culpable homicide, 40 per cent.)	244
,, ,, hurt	2,691
,, ,, rape	76
,, ,, robbery	654
